

HMIC Fan Powered & Bypass Humidifiers

Controlling your indoor humidity is very important. In many cases the air inside a home is drier than a desert. Dry, indoor air is often the culprit for such common problems as itchy or cracked skin, eye irritation, dry nasal passages and damaged home furnishings. Dry indoor air can also increase the possibility of catching cold and flu viruses and can reduce the efficiency and effectiveness of your heating system.

All of these problems can be alleviated with the help of a HMIC Series humidifier. HMIC Series offers three humidifier models designed to put moisture back into your indoor environment so you can relax in warm, soothing comfort. Depending on the model that best matches your system, a HMIC humidifier can deliver between 12 and 18 gallons of moisture per day to minimize the problems of excessively dry air. And, because humidified air feels warmer, you'll be comfortable at lower heating temperatures for higher efficiency operation.

FEATURES:

EASY ACCESS FOR CLEANING AND MAINTENANCE

- The treated aluminum pad ensures top performance. Front access door allows for quick and convenient removal and replacement of pad.

SMOOTH, LOW NOISE OPERATION

- Nearly silent operation is the result of the precision-engineered fan and motor combination. Air is drawn through the evaporator pad quietly and efficiently, turning water into the water vapor that humidifies your home.

LONG LASTING, ATTRACTIVE COVER

- The outside casing of the humidifiers are made from durable UV Resistant Plastic.

OPTIMUM DISTRIBUTION OF MOISTURE

- Through the combination of the solenoid valve and water distribution system, your home will benefit from the optimum distribution of moisture possible.

TWO HUMIDITY CONTROL OPTIONS

- Choose between two separate control options – the Humidity Control™, which is included with the humidifier and the TSTAT0713. Each of these controls provide precise control over the humidity levels in your home.

RESIDENTIAL AND COMMERCIAL SYSTEMS • SPLIT SYSTEMS • PACKAGED AIR CONDITIONERS
• COMBINATION GAS / ELECTRIC UNITS • HEAT PUMPS • AIR HANDLERS • MANUFACTURED
HOME AIR CONDITIONERS • GAS, OIL AND ELECTRIC FURNACES
