Product Specifications

13 SEER PACKAGE AIR CONDITIONER UNIT (Single Phase) 23 to 53 MBtuh

REFRIGERATION CIRCUIT

- All models are equipped with high efficiency Copeland scroll compressor, 4 & 5 ton have two stage scroll compressors.
- Thermostat Expansion Valve (TXV) controls refrigerant flow.
- High Efficiency indoor motors on all models.
- Factory charged with R-22 refrigerant.

BUILT TO LAST

- Galvanized-painted cabinet. One piece weather resistant top. Access panels for easy service. Side by side supply and return. Heavy gauge base rails.
- Triple-coated steel, consisting of a polyester top coat, a urethane primer coat preceded by an oxide pretreatment.
- Integral base rails with fork-lift access. Holes provided for lifting lugs makes rooftop installation easier.
- The condenser coil has a sturdy wire inlet grille and UV rated vinyl mesh installed on the surface of the coil for additional protection.
- Drawn fan orifice and swept fan blades on most models for quieter operation.

EASY TO INSTALL AND SERVICE

- Combination electric cooling and heat, self contained for year-round comfort. Systems installed on rooftop or ground level. The unit is shipped in the horizontal position and can easily be converted to downflow.
- Externally-mounted gauge ports allow for more accurate reading of operating conditions while servicing.
- Electrical controls located behind one exterior panel for easier maintenance.

ELECTRIC HEAT

- 5 to 20 kw.

WARRANTY

- 5 year compressor limited warranty
- 5 year parts limited warranty

Notes: Air Delivery @ listed external static pressure are taken at 230Volts with Dry coil, no filter and approved heater.

For wet coil add .05 in. wc. to Static Pressure measurement. Note for 208 Volts applications, reduce airflow by 15%.

Notes: When the required data fall between the published data, interpolation may be performed. Extrapolation is not an acceptable practice.

† Total capacities are net capacities. Blower heat has been subtracted

†† At TVA rating indoor condition (75 F db/ 63 F wb), All other indoor air temperatures are at 80 F db

* System kW is total unit kW

Key: Standard Rating

S/T are based on 80°F db entering air at the indoor coil. For sensible capacities at other than 80°F db, deduct 835 Btuh per 1000 cfm of indoor coil air from MBhS/T for each degree below 80°F, or add 835 Btuh per 1000 cfm of indoor coil air from MBhS/T for each degree above 80°F.

Notes: When the required data fall between the published data, interpolation may be performed. Extrapolation is not an acceptable practice.

† Total capacities are net capacities. Blower heat has been subtracted

†† At TVA rating indoor condition (75 F db/ 63 F wb), All other indoor air temperatures are at 80 F db

* System kW is total unit kW

Key: Standard Rating

S/T are based on 80°F db entering air at the indoor coil. For sensible capacities at other than 80°F db, deduct 835 Btuh per 1000 cfm of indoor coil air from MBhS/T for each degree below 80°F, or add 835 Btuh per 1000 cfm of indoor coil air from MBhS/T for each degree above 80°F.

GUIDE SPECIFICATION

CABINET

The cabinet is made of triple-coated steel, consisting of a Polyester top coat, a urethane primer coat preceded by an oxide pretreatment. One piece weather resistant top. The base rails are 16 gauge steel with fork lift slots and holes provided for lifting shackles. The unit is designed with convertible airflow for either horizontal or downflow applications with conversion accomplished by relocating two panels. Indoor blower compartment interior cabinet surfaces are insulated with a minimum 1/2" thick, flexible glass insulation, coated on the air side. Aluminum foil faced glass fiber insulation is used in the furnace compartment.

COOLING SECTION

The unit is factory charged and operationally ready upon delivery. The unit refrigerant circuit has a high efficiency scroll compressor with internal overload protection, and copper tube / aluminum fin evaporator and condenser coils. The unit is designed for cooling operation to 40° F and will be capable of being wired for field installed economizer type accessories.

COILS

The evaporator and condenser coils are fabricated with aluminum fins mechanically bonded to copper tubing. Both coils are pressure tested prior to assembly into the unit and electronically leak tested after assembly into the unit.

CONDENSER FAN

The unit has a single direct-drive propeller-fan / motor assembly. The assembly is mounted directly to a vertical-discharge grille that is easily removed for service. Motors are 1100 RPM with sleeve or ball bearings and internal overload protection.

EVAPORATOR BLOWER

All units have a direct-drive evaporator blower motor as a standard. The direct-drive evaporator blower motor has sleeve bearings and internal overload protection.
